

Privacy Policy

1. Purpose

The privacy and data protection privacy policy that is managed by the company is defined here. Through this policy, customers can learn more about the type of information the company collects for them and how the company uses this information.

2. FIELD OF APPLICATION

The policy applies to the protection of personal data of individuals and is posted on the company's website.

3. RESPONSIBILITIES

The company's management is responsible for designing, implementing and implementing the policy. Those responsible for implementing control and redefining the policy when required is the Company's Management.

4. DESCRIPTION

The company is committed to protecting the confidentiality and trust of the information provided to it and complies with the applicable Personal Data Protection legislation. The company collects personal data in the context of providing professional services. The Company is committed to protecting and using appropriately the personal information (often referred to as "personal data") collected either online or by contacting any third party. The purpose of the company is to collect only the personal data voluntarily provided by clients so that they can provide them information and / or services or information on business opportunities.

This policy includes the following:

- 4. Collection and use of Personal Data
 - o 4.1 Automatic collection of personal data
 - A. IP Addresses
 - B. Cookies
 - C. GoogleAnalytics
 - D. Webbeacons
 - E. Tools based on geographic location
 - F. General Analytics
 - o 4.1.1 Social networking applications and widgets
 - o 4.1.2. Children
 - 4.2. Disclosure and Transfer of Personal Data

- 4.3. Choices
- 4.4. Access
- 4.5. Security and Data Storage
- 4.6. Providing professional services
- 4.7. Changes to this Statement
- 4.8. Contact us

4. Collection and use of Personal Data

The company receives the personal data of customers if they choose to provide them - for example, if they contact mails or subscribe to the forms available on the company's site. In some cases, they may have previously given their Personal Data to the company (if, for example, it is a former client of the company).

If the customer chooses to sign up or log on to the company's website using a third unique sign-on service that testifies to their identity and links their login information to social media (e.g., Facebook, Google, or Instagram) with the company, the company collects any information or content needed for registration or connection that has been given to the social network provider to share with the company, such as his client's name and e-mail address chloride. The collection of other information may depend on the customer's privacy settings with the provider of the social media provider, so the customer is asked to study the privacy statement or privacy policy of the relevant service.

By registering and / or submitting your personal data to the company, the customer also agrees to the use of this data in accordance with this Statement. Personal data is not used for other purposes, unless we obtain his or her permission or unless this is required or permitted by law or by professional standards.

For example, if the customer enters the company's website and provides information about his or her preferences, the company uses this information to personalize the customer experience as a user.

In some cases where the customer has subscribed to certain services, the company may temporarily store the customer's email address until it has received the confirmation of the information it provided via email (by sending an e-mail to the address provided by the customer at check box to confirm the registration request).

The company generally collects only personal data that is necessary to meet customer requests. Where additional, optional information is sought, customers are informed at the time of data collection.

The company collects "sensitive" personal data only when these individuals offer this data voluntarily or when such data is required or their collection is permitted by law. Please do not provide sensitive data to the Company unless this is required for the purpose of providing personal data and in no way give sensitive data to the Company unless you hereby consent to the use of such data by the company for the legitimate business purposes and if you consent to the transmission and storage of this data to and to company databases.

4.1 Automatic collection of personal data

In some cases, the company and its service providers use cookies, webbeacons and other technologies to automatically collect certain categories of data when the customer visits it online as well as through the emails they exchange with the company. The collection of these data allows the company to personalize the customer's online experience, improve the performance, usability and effectiveness of the company's online presence and evaluate the effectiveness of the marketing activities of its services.

A. IP Addresses

IP address is a number that is assigned to each client's computer each time it accesses the internet. It allows computers and servers to identify and communicate with each other. The IP addresses from which visitors appear to be logged may be logged for security of information technology and system diagnostics. These data may also be used in aggregate form in order to analyze the trends and performance of the site.

B. Cookies

By cookies we mean small text files that are stored either on the computer or on any electronic device we use. The purpose of cookies is to notify the user's web site about their previous activity. Memorize information that they recall to a future user's future visit to the site. Cookies may be placed on the customer's computer or on their Internet-enabled device whenever they visit the company's website. This allows the website to remember the client's computer or device and serve more purposes. Cookies are an important factor in the smooth operation of the website. The purpose of using cookies is primarily to collect information and measure specific indices set by the company (eg the most popular product) with the ultimate goal of improving the user's visit.

A banner will appear on the company's website, which will require your consent to the collection of cookies. If you do not give consent, your computer or your Internet-enabled device will not be tracked for service-related activities. A secondary type of cookies, referred to as "user-input" cookies, may be required to ensure the necessary functionality. These cookies will not be blocked by using this banner. The customer option is stored in a cookie and is valid for a period of 90 days. If the customer wishes to revoke his choice, he can do so by deleting his browser cookies. Although most browsers automatically accept cookies, the customer can choose to accept cookies through their browser settings (often found in the Browser Tools or Preferences menu). The customer can also delete cookies from his or her device at any time. However, the customer should be aware that if he does not accept cookies, he may not be able to fully know some of the features of the company's website.

Additional information on how cookies can be handled can be found in your browser's "Help" folder or via web pages such as www.allaboutcookies.org.

There are two types of cookies: 1) cookies per session; 2) permanent cookies. In the first category, cookies are deleted as soon as the user leaves the web site while in the second category the cookies remain on the user's computer or user's device permanently or until they are deleted by the user of the site itself.

There are two types of cookies: 1) cookies per session; 2) permanent cookies. In the first category, cookies are deleted as soon as the user leaves the web site while in the second category the cookies remain on the user's computer or user's device permanently or until they are deleted by the user of the site itself.

The above two types of cookies can be distinguished in four categories:

1. Absolutely necessary cookies: These are the cookies that are absolutely necessary to browse the user on the site or to provide some of the features he or she has requested.
2. Function Cookies: Function Cookies allow the website to memorize the user's choices (such as user name, language, etc.) and provide enhanced capabilities.
3. Performance Cookies / Analytics: These cookies collect non-personal data. Data in a format that does not allow identification with a particular person. The data collected helps to improve web sites after they detect any problems the user might encounter while browsing while they are receiving updates on how to visit the website and the pages that the user has visited.
4. Third Party Cookies: Applies to cookies used by third parties, such as social networks to monitor user visits to the various sites they advertise. The site administrator has no control over these third-party cookies.

Cookies on their own do not disclose the customer's email address to the company or identify personal data in any other way. In analytical reports, the company may receive identification information, including IP addresses, but only to identify the number of unique visitors to the company's website and the geographical origin of the visitors, and not to identify individual visitors.

C. Google Analytics

The company uses Google Analytics. More information about how to use GoogleAnalytics can be found here:

<http://www.google.com/analytics/learn/privacy.html>

In order to provide site visitors with more choices about how to collect their data from Google Analytics, Google has developed the Google Analytics Opt-out BrowserAdd-on. The add-on communicates with Google Analytics JavaScript (ga.js) to show that the information about the visit to the website should not be sent to Google Analytics. The Google Analytics Opt-out Browser Add-on does not prevent you from sending information to the site itself or other web analytics services.

D. Web beacons

Web beacons is a small image file (imagefile) on a web page that can be used to

collect some data from the client's computer, such as IP addresses, the time the content of the webpage was viewed, the type of browser and the existence of cookies previously placed by the same server. The company uses webbeacons only in accordance with the provisions of the current legislation.

The company or its serviceproviders may use webbeacons to track the effectiveness of third party sites providing advertising services or to collect aggregate visitor statistics and manage cookies.

The client has the option to make some web beacons inactive by discarding the relevant cookies. The web beacons will still be able to record an anonymous visit from your IP address, and the cookie information will not be recorded.

Tools based on geographic location

This location data is collected to provide customers with information about the services that the company believes may be of interest to them based on their geographic location as well as the improvement of products and services provided by the company based on geographical location.

4.1.1. Social networking applications and widgets

The company's website may include functionality that the customer can share through social networking applications such as the Facebook button like Twitter and the widget. These social networking applications can collect and use information about customer use on the company's website (see above for details about "Social Networking" cookies). Any personal information you provide through such social networking applications may be collected and used by other members of that social networking application and these exchanges are governed by the privacy policies of the implementing companies. The company has no control or responsibility for these companies or the use of customer information from them.

In addition, the company's website can host blogs, forums, crowd-sourcing and other applications or services (collectively referred to as "social networking features"). The purpose of social networking features is to facilitate the exchange of information and content. Any personal information you provide in any social media function of the company may be shared with other users of this social media feature (unless otherwise noted at the collection point) on which we may have little or no control.

4.1.2. Children

The company understands the importance of protecting children's personal data, especially in an online environment.

Specifically, our site is neither designed intentionally nor intended for children under 13 years of age. The policy of the company is never to collect or to keep a record of any person under the age of 13.

4.2. Disclosure and Transfer of Personal Data

The company does not share personal data with third parties that are not affiliated with it unless required for its legitimate business purposes and business needs to meet customer requests and / or as required or permitted by law.

In some cases, the company may share customer's personal data with various external companies or service providers or vendors working on behalf of the company to respond to customer requests after they have been informed in advance and given their consent. Also, the company may transfer certain personal data outside of the geographical boundaries to other member companies of the company or to external companies that cooperate with or on behalf of our company. The company may also store personal data in a jurisdiction other than that where the customer is located. By providing personal data over the Internet, visitors consent to this transfer and / or the storage of their personal data abroad.

The company may also transfer certain personal data relating to the sale or assignment of the site-site to which the data relate in order to respond to government or law enforcement requests or when required by applicable law , court decisions or legislative regulations. Such disclosures may also be required for privacy or security controls and / or for investigating or responding to security complaints or threats.

The company does not sell personal data to any third party. Also, the company will not pass on the personal data that customers provide to any third party.

4.3 Options

The company does not require its customers to submit personal data online but they can ask customers to provide it with some personal data in order to receive additional information about the company's services and events.

The company may also ask customers for certain uses of their personal data and they may either consent or deny these uses. If they want specific services or communications, such as an electronic newsletter, they can be deleted from the relevant recipients directory at any time by following the instructions contained in each communication. If they decide to delete from a service or communication, the company will try to delete their data as soon as possible, although it may take some time and / or information before it can process this request.

4.4 Access

Each customer has the right to request a copy of the personal data that the company holds for him, as well as to revise them and generally exercise any rights provided by the law for the protection of personal data.

If you would like to submit a request or if you are concerned about any of the above, please contact us at info@chrisomelo.com

4.5 Security and Storage of Data

The Company applies reasonable policies and technical and organizational security policies to protect personal data and information from loss, misuse, alteration or destruction. In addition, it endeavors to ensure that access to personal data is limited to those who need to be aware of them. People who have access to the data are required to keep the data confidential.

We point out that the transmission of information over the Internet is not absolutely safe. The company makes every effort to protect the personal data of customers, but can not

guarantee the security of the data transmitted to the site. After receiving customer data, we apply rigorous security procedures and operations to try to prevent unauthorized access. The Company makes every reasonable effort to keep the personal data collected from customers only for the time it takes for the purpose for which they were collected or until their removal is requested (if this occurs earlier) if it continues to observe them as provided in the applicable legislation.

4.6 Providing professional services

The company receives personal data when providing professional services - usually when providing services to individuals, employers, businesses with natural persons and the private sector. Her relationships with customers are governed by co-operation letters and general terms and conditions, including the use of personal data they receive. The company provides information of various types and its role may not always be clear to the data subjects. However, the company complies with its obligations under applicable Greek and European legislation on the protection of personal data and the applicable regulatory directives relating to the management of personal data.

4.7 Changes to this Statement

The Company submits this Statement to a frequent review and may periodically amend or revise it at its sole discretion. When changes occur, the date of the change or revision will be recorded in the Statement. The updated Statement will apply to customers and their data from that date. At the same time there will be a mark on the company's website indicating the change or modification of the Policy.

The company encourages customers to study during this period this Statement in order to examine whether there are any changes to the way the company manages their personal data. This Statement was last updated in September 2018.

4.8 Contact us

If the customer has any questions, comments or complaints about the management or protection of his or her personal data or if he wants to modify his or her personal data or exercise any of his or her rights as a data subject, please contact info@chrisomelo.com
